FACTUAL ALLEGATIONS

10. On October 23, 2012, the United States Patent and Trademark Office (“USPTO”) duly and legally issued the ‘549 Patent, entitled “Streaming Method for Transmitting Telephone System Notifications to Internet Terminal Devices in Real Time” after a full and fair examination. The ‘549 Patent is attached hereto as Exhibit A and incorporated herein as if fully rewritten.

11. Plaintiff is presently the owner of the ‘549 Patent, having received all right, title and interest in and to the ‘549 Patent from the previous assignee of record. Plaintiff possesses all rights of recovery under the ‘549 Patent, including the exclusive right to recover for past infringement.

12. To the extent required, Plaintiff has complied with all marking requirements under 35 U.S.C. §287.

13. The invention claimed in the ‘549 Patent comprises a method for an application involving real-time notification of a client by a telephone switching system.

14. The ‘549 Patent contains two independent claims and eight dependent claims.

15. Claim 1 of the ‘549 Patent states:

“1. A method for an application involving real-time notification of a client by a telephone switching system, comprising:

- a) opening a connection between the client and a server;
- b) transmitting notification messages from the telephone switching system to the server using a networking protocol;
- c) transforming the notification messages at the server into a programming language code and using said networking protocol for sending the programming

language code to the client, wherein the programming language code is executable by the client's browser;

d) using an HTTP streaming mechanism for transmission of the notification from the server to the browser through the open connection, whereby the connection between the client and the server remains open in the intervening period between the transmission of individual notification messages; and

e) executing the programming language codes by the browser whereby the respective notification messages are displayed or outputted at the client.” See Exhibit A.

16. Claim 4 of the ‘549 Patent states the method according to Claim 1, further comprising: using the HTTP protocol for the client-server connection.

17. Defendant commercializes, inter alia, methods that perform all the steps recited in at least one claim of the ‘549 Patent. More particularly, Defendant commercializes, inter alia, methods that perform all the steps recited in Claims 1 and 4 of the ‘549 Patent. Specifically, Defendant made, used, sold, offered for sale, or imported a product practicing a method that encompasses that which is covered by Claims 1 and 4 of the ‘549 Patent.

DEFENDANT’S PRODUCTS

18. Defendant offers products, such as “Evolve IP Call Center” (the “Accused Instrumentality”)¹, that practices a method for an application involving real-time notification (e.g., incoming call notification, etc.) of a client by a telephone switching system. A non-limiting and exemplary claims chart comparing the Accused Instrumentality to Claims 1 and 4 of the ‘549 Patent is attached hereto as Exhibit B and incorporated herein as if fully rewritten.

19. As recited in one step of Claim 1, the Accused Instrumentality practices opening a connection between the client (e.g., when a user login to Evolve IP- Call Center Web Portal account for receiving incoming calls) and a server (e.g., Evolve IP server). See Exhibit B.

¹ The Accused Instrumentality is just one of the products provided by Defendant, and Plaintiff’s investigation is on-going to additional products to be included as an Accused Instrumentality that may be added at a later date.

20. As recited in another step of Claim 1, the Accused Instrumentality practices transmitting notification messages from the telephone switching system (e.g. calls that originate from a traditional phone switching network) to the server (e.g., Evolve IP server) using a networking protocol (e.g., IP). See Exhibit B.

21. As recited in a third step of Claim 1, the Accused Instrumentality practices transforming the notification messages (e.g., incoming call notification, etc.) at the server (e.g., Evolve IP server) into a programming language code (e.g., markup language code such as HTML code) and using said networking protocol (e.g., IP) for sending the programming language code to the client (e.g., a user utilizing a web browser based version of the Evolve IP- Call Center), wherein the programming language code is executable by the client's browser (e.g., the web browser of a user). See Exhibit B.

22. As recited in another step of Claim 1, the Accused Instrumentality uses an HTTP streaming (e.g., call or a messaging session streaming to a user's web browser) mechanism for transmission of the notification (e.g., incoming call notification, etc.) from the server (e.g., Evolve IP server) to the browser (e.g., web browser of the user such as Google Chrome) through the open connection (e.g., a chat or a call queue which supports transmission and storage of notifications from Evolve IP server to a said website with the Web Widget), whereby the connection between the client and the server remains open in the intervening period between the transmission of individual notification messages. See Exhibit B.

23. As recited in another step of Claim 1, the Accused Instrumentality practices executing the programming language codes (e.g., markup language code such as HTML code) by the browser (e.g., web browser of the user such as Google Chrome) whereby the respective

notification messages are displayed or outputted (e.g., display notification or play sound) at the client. See Exhibit B.

24. As recited in Claim 4 of the '549 Patent, the Accused Product uses the HTTP protocol (e.g., by means of a http browser) for the client-server connection. See Exhibit B.

25. The elements described in the preceding paragraphs are covered by at least Claims 1 and 4 of the '549 Patent. Thus, Defendant's use of the Accused Instrumentality is enabled by the method described in the '549 Patent.

INFRINGEMENT OF THE '549 PATENT

26. Plaintiff realleges and incorporates by reference all of the allegations set forth in Paragraphs 1 to 23.

27. In violation of 35 U.S.C. § 271, Defendant directly infringed the '549 Patent.

28. Defendant has had knowledge of infringement of the '549 Patent at least as of the service of the present Complaint.

29. Defendant has directly infringed at least one claim of the '549 Patent by using, at least through internal testing or otherwise, the Accused Instrumentality without authority in the United States. As a direct and proximate result of Defendant's direct infringement of the '549 Patent, Plaintiff has been and continues to be damaged.

30. By engaging in the conduct described herein, Defendant has injured Plaintiff and is thus liable for infringement of the '549 Patent, pursuant to 35 U.S.C. § 271.

31. Defendant has committed these acts of infringement without license or authorization.

32. As a result of Defendant's infringement of the '549 Patent, Plaintiff has suffered monetary damages and is entitled to a monetary judgment in an amount adequate to compensate for Defendant's past infringement, together with interests and costs.

33. Plaintiff reserves the right to modify its infringement theories as discovery progresses in this case; it shall not be estopped for infringement contention or claim construction purposes by the claim charts that it provides with this Complaint. The claim chart depicted in Exhibit B is intended to satisfy the notice requirements of Rule 8(a)(2) of the Federal Rule of Civil Procedure and does not represent Plaintiff's preliminary or final infringement contentions or preliminary or final claim construction positions.

DEMAND FOR JURY TRIAL

34. Plaintiff demands a trial by jury of any and all causes of action.

PRAYER FOR RELIEF

WHEREFORE, Plaintiff prays for the following relief:

- a. That Defendant be adjudged to have directly infringed the '549 Patent either literally or under the doctrine of equivalents;
- b. An accounting of all infringing sales and damages including, but not limited to, those sales and damages not presented at trial;
- c. An award of damages pursuant to 35 U.S.C. §284 sufficient to compensate Plaintiff for the Defendant's past infringement, including compensatory damages;
- d. An assessment of pre-judgment and post-judgment interest and costs against Defendant, together with an award of such interest and costs, in accordance with 35 U.S.C. §284;
- e. That Defendant be directed to pay enhanced damages, including Plaintiff's attorneys' fees incurred in connection with this lawsuit pursuant to 35 U.S.C. §285; and

f. That Plaintiff be granted such other and further relief as this Court may deem just and proper.
