3. This is an action for patent infringement arising under the patent laws of the United States, Title 35 of the United States Code.

4. This Court has exclusive subject matter jurisdiction under 28 U.S.C. §§ 1331 and 1338(a).

As described below, Defendant has committed acts of patent infringement giving rise to this action within this District.

VENUE

6. Venue is proper in this District under 28 U.S.C. § 1400(b) because Defendant has committed acts of patent infringement in this District and maintains a regular and established place of business in this District's state at the Austin-Bergstrom International Airport located at 3600 Presidential Blvd, Austin, TX 78719.

PATENT-IN-SUIT

7. Plaintiff is the assignee of all right, title and interest in United States Patent No. 6,711,204 (the "Patent-in-Suit" or the "204 Patent"); including all rights to enforce and prosecute actions for infringement and to collect damages for all relevant times against infringers of the Patent-in-Suit. Accordingly, Plaintiff possesses the exclusive right and standing to prosecute the present action for infringement of the Patent-in-Suit by Defendant.

THE '204 PATENT

8. The '204 Patent is entitled "Channel sounding for a spread-spectrum signal," and issued 03/23/2004. The application leading to the '204 Patent was filed on 07/19/2001. A true and correct copy of the '204 Patent is attached hereto as Exhibit 1 and incorporated herein by reference.

9. The '204 Patent is valid and enforceable.

COUNT 1: INFRINGEMENT OF THE '204 PATENT

10. Plaintiff incorporates the above paragraphs herein by reference.

11. **Direct Infringement.** Defendant has directly infringed claims 3, 25, and 26 of the '204 Patent in at least this District by making, using, offering to sell, selling and/or importing, without limitation, at least the Defendant products identified in the charts incorporated into this Count below (among the "Exemplary Defendant Products") that infringe claims 3, 25, and 26 of the '204 Patent also identified in the charts incorporated into this Count below literally or by the doctrine of equivalents. On information and belief, numerous other devices that infringe claims 3, 25, and 26 of the '204 Patent have been made, used, sold, imported, and offered for sale by Defendant and/or its customers.

12. Defendant also has directly infringed, literally or under the doctrine of equivalents, claims 3, 25, and 26 of the '204 Patent Claims, by having its employees internally test and use these Exemplary Products.

13. Exhibit 2 includes charts comparing claims 3, 25, and 26 of the '204 Patent to the Exemplary Defendant Products. As set forth in these charts, the Exemplary Defendant Products practice the technology claimed by the '204 Patent. Accordingly, the Exemplary Defendant Products incorporated in these charts satisfy all elements of claims 3, 25, and 26 of the '204 Patent.

14. Plaintiff therefore incorporates by reference in its allegations herein the claim charts of Exhibit 2.

15. Plaintiff is entitled to recover damages adequate to compensate for Defendants infringement.
