1

I.

## NATURE OF THE ACTION

This is a civil action arising under the patent laws of the United States, 35 U.S.C.
 § 1 et seq., including 35 U.S.C. § 271, based on Cisco's unauthorized and willfully infringing
 manufacture, use, sale, offering for sale, and/or importation of products and the practicing of
 methods incorporating InfoExpress's patented inventions.

- 2. InfoExpress is owner of all right, title, and interest in and to multiple United
  States patents including United States Patent Nos. 7,523,484 (the '484 Patent); 8,051,460 (the
  '460 Patent); 8,677,450 (the '450 Patent); 8,578,444 (the '444 Patent); 8,347,350 (the '350
  Patent); and 8,117,645 (the '645 Patent) (collectively, "the Patents-in-Suit").
- Cisco manufactures, makes, uses, provides, sells, offers for sale, imports, and/or
   distributes products, services, and systems which directly infringe the Patents-in-Suit. The
   Patents-in-Suit represent InfoExpress's significant investment into the network access and
   security space.
- 14II.THE PARTIES

4. Plaintiff InfoExpress is a California corporation with its principal place of
business located at 2975 Bowers Ave #323, Santa Clara, CA 95051.

5. Defendant Cisco Systems, Inc. is a corporation that is organized under the laws of
Delaware and that has place of business located at 170 West Tasman Dr., San Jose, CA 95134.

19 **III**.

## III. JURISDICTION AND VENUE

- 20 6. This is an action for patent infringement, which arises under the Patent Laws of
- the United States, in particular, 35 U.S.C. §§ 271, 281, 282, 284, and 285. This Court has
- 22 jurisdiction over the subject matter of this action under 28 U.S.C. §§ 1331 and 1338(a).
- 23
   7.
   The Court has personal jurisdiction over Cisco because it is headquartered within
- 24 this judicial district and further because it has committed acts giving rise to this action within

| 1  | California and within this District. Cisco also regularly does business or solicits business in this |  |  |  |  |  |
|----|--|--|--|--|--|--|
| 2  | District and in California, engages in other persistent course of conduct and derives substantial    |  |  |  |  |  |
| 3  | revenue from products and/or services provided in this District and in California, and has           |  |  |  |  |  |
| 4  | purposefully established substantial, systematic and continuous contacts with this District and      |  |  |  |  |  |
| 5  | should reasonably expect to be sued in a court in this District.                                     |  |  |  |  |  |
| 6  | 8. Cisco has committed acts of patent infringement in this District and elsewhere in                 |  |  |  |  |  |
| 7  | California.  |  |  |  |  |  |
| 8  | 9. Venue is proper in this District under 28 U.S.C. §§ 1391 and 1400(b) because                      |  |  |  |  |  |
| 9  | Cisco has an established place of business in this District, including at 170 West Tasman Dr.,       |  |  |  |  |  |
| 10 | San Jose, CA 95134, has committed acts within this District giving rise to this action and           |  |  |  |  |  |
| 11 | resulting in the derivation of substantial revenue from goods and services provided to customers     |  |  |  |  |  |
| 12 | in California, and continues to conduct business in this District, including one or more acts of     |  |  |  |  |  |
| 13 | selling, using, importing, and/or offering for sale infringing goods and/or performing support       |  |  |  |  |  |
| 14 | service to Cisco customers in this District.   |  |  |  |  |  |
| 15 | IV. <u>INTRADISTRICT ASSIGNMENT</u>  |  |  |  |  |  |
| 16 | 10. Pursuant to Local Rule 3-2(c) and the Court's Assignment Plan (General Order                     |  |  |  |  |  |
| 17 | No. 44) D(3), intellectual property cases, such as this one, are assigned on a district-wide basis.  |  |  |  |  |  |
| 18 | V. <u>FACTUAL ALLEGATIONS</u>  |  |  |  |  |  |
| 19 | InfoExpress's Innovations  |  |  |  |  |  |
| 20 | 11. Established in 1993, InfoExpress is a privately held network security solutions                  |  |  |  |  |  |
| 21 | corporation with its offices in Santa Clara, California.   |  |  |  |  |  |
| 22 | 12. Since its inception, and leading up to its groundbreaking patented network access                |  |  |  |  |  |
| 23 | control ("NAC") and endpoint compliance innovations, InfoExpress has been a pioneer in               |  |  |  |  |  |
| 24 | designing and implementing foundational security technologies.                                       |  |  |  |  |  |
|    |  |  |  |  |  |  |
|    | COMPLAINT FOR PATENT INFRINGEMENT Case No.   |  |  |  |  |  |

## Case 4:23-cv-02698-YGR Document 1 Filed 05/31/23 Page 4 of 38

InfoExpress's security innovation dates as early as the 1990s when it developed
 Virtual Transmission Control Protocol ("VTCP"), a virtual application programming interface
 ("API") that allowed online dial-up accounts to run internet applications directly on user
 personal computers.

- 5 14. VTCP was used by InfoExpress's corporate customers to provide remote
  6 employee access to corporate networks. This, however, required additional security.
- 7 15. In response, InfoExpress developed and introduced VTCP Secure in 1996. VTCP
  8 Secure was a seminal approach to remote access Virtual Private Networks ("VPN"). Like its
  9 predecessor, VTCP Secure was also tremendously popular and sales jumped exponentially. It
  10 also garnered substantial industry praise.<sup>1</sup>
- As culture evolved, additional security measures were needed to protect corporate
   resources from potentially compromised remote VPN-connected PCs. Thus, in or around 2000,
   InfoExpress developed CyberArmor—a personal firewall that provided protection to the PCs.
- Again, InfoExpress received praise and awards in the security industry for CyberArmor.
  17. While CyberArmor was successful, InfoExpress customers reported that some
- individual users did not install CyberArmor or disabled it. To address this issue, InfoExpress innovated to develop a CyberGatekeeper Remote product and service which could be placed between VPN servers and its corporate customer networks to monitor whether the CyberArmor personal firewall was installed and active on the remote PC before granting access to the corporate network.

COMPLAINT FOR PATENT INFRINGEMENT

# Case 4:23-cv-02698-YGR Document 1 Filed 05/31/23 Page 5 of 38

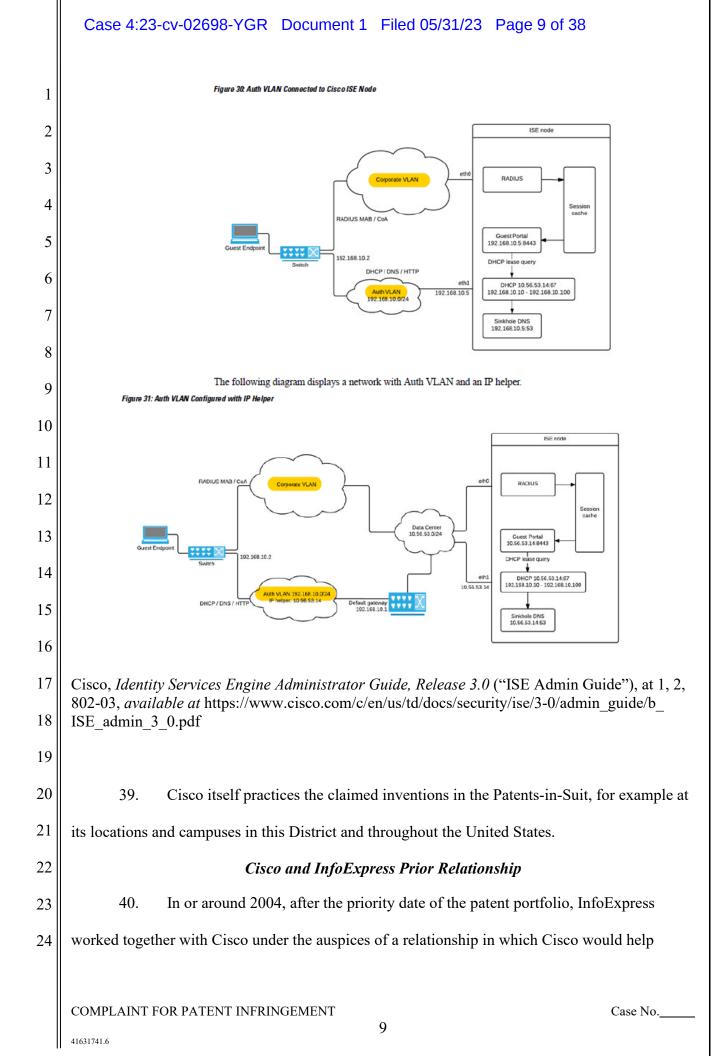

| 1  | 18. A shift in the security space came when companies started transitioning   |  |  |  |  |
|--|---|--|--|--|--|
| 2  | employees from desktops to mobile devices such as laptops. While this expanded mobile   |  |  |  |  |
| 3  | network connectivity and usage, it also increased corporate security risks. Because   |  |  |  |  |
| 4  | CyberGatekeeper Remote was located behind VPN servers and because a corporate organization  |  |  |  |  |
| 5  | provided access to the network with hundreds, if not, thousands of switches, adding extra   |  |  |  |  |
| 6  | CyberGatekeeper Remote behind each switch was impractical.  |  |  |  |  |
| 7  | 19. Accordingly, in 2003, InfoExpress invented network access control through   |  |  |  |  |
| 8  | insertion of a gatekeeper between access devices and the authentication servers via a new NAC   |  |  |  |  |
| 9  | product. This product, called CyberGatekeeper LAN, was the world's first network access   |  |  |  |  |
| 10   | control product for the local area networks ("LAN").  |  |  |  |  |
| 11   | 20. To date, InfoExpress continues to offer products and services in the network  |  |  |  |  |
| 12   | security space. However, Defendant's infringement and usurping of InfoExpress's patented  |  |  |  |  |
| 13   | technology have resulted in a loss of market share, loss of customers, and declining sales.   |  |  |  |  |

|        | COMPLAINT FOR PATENT INFRINGEMENT Case No<br>41631741.6 7  |  |  |  |  |

1 36. In particular, the Cisco ISE can be used to "control and audit the configuration of 2 network devices... Network devices can be configured to query Cisco ISE for authentication and 3 authorization of device administrator actions." 4 **Cisco ISE Features** 5 Device Administration: Cisco ISE uses the TACACS+ security protocol to control and audit the 6 configuration of network devices. It facilitates granular control of who can access which network device and change the associated network settings. Network devices can be configured to query Cisco ISE for 7 authentication and authorization of device administrator actions. These devices also send accounting messages to Cisco ISE to log such actions. 8 Posture or Compliance: Cisco ISE allows you to check for compliance, also known as posture, of 9 endpoints, before allowing them to connect to your network. You can ensure that endpoints receive the appropriate posture agents for posturing services. 10 37. As a security policy management platform, Cisco's ISE "allows you to check for 11 compliance, also known as posture, of endpoints, before allowing them to connect to your 12 network." 13 38. For authentication, Cisco's ISE also interfaces with and controls access points – 14 such as those offered by Cisco and including routers or switches – to further network access 15 16 control. For example, ISE can use an Authorization VLAN (Virtual Local Area Network) as a restricted space to confine a user endpoint device (e.g. laptop computer, smart phone, etc.) when 17 it connects to an access point. While the endpoint is confined, Cisco's ISE can use its security 18 19 gatekeeper to assess the security posture of that device. Once the endpoint is found to meet security requirements, ISE reconfigures the access point by assigning the endpoint to another 20VLAN (e.g. Corporate VLAN) where the endpoint device will be able to access, and 21 communicate with, secure resources. 22 23 24 Case No.\_ COMPLAINT FOR PATENT INFRINGEMENT 8

### Case 4:23-cv-02698-YGR Document 1 Filed 05/31/23 Page 10 of 38

commercialize InfoExpress's NAC technology products—including its CyberGatekeeper LAN
 product—through interoperability with Cisco's routing, switching, security, wireless, and voice
 products.

4 41. Through this arrangement, InfoExpress was asked to integrate its NAC
5 technology products with Cisco's access point and infrastructure products. To do so, InfoExpress
6 was required to conduct a variety of testing, configuring, and analysis with respect to its NAC
7 technology products and to obtain Cisco's approval.

8 42. Cisco eventually approved it, thus permitting InfoExpress to participate in
9 marketing activities, which resulted in substantial customer response and feedback with respect
10 to its NAC technology products.

43. This relationship and process also resulted in Cisco receiving this important and
valuable knowledge, technical expertise, customer feedback, and information concerning
InfoExpress's NAC technology including that associated with the various NAC functionalities
for authentication, policy enforcement and posture compliance.

44. After receiving such valuable information regarding InfoExpress's NAC
technology (and other third-party NAC products) and customer feedback, Cisco canceled its
arrangement with InfoExpress and substituted in its own NAC technology products that it had
been developing alongside which would be compliant with its Cisco access points and network
infrastructure.

45. On information and belief, Cisco used the information it obtained through its
relationship with InfoExpress to develop its own NAC technology products and to compete with
InfoExpress.

COMPLAINT FOR PATENT INFRINGEMENT

41631741.6

Case No.\_\_

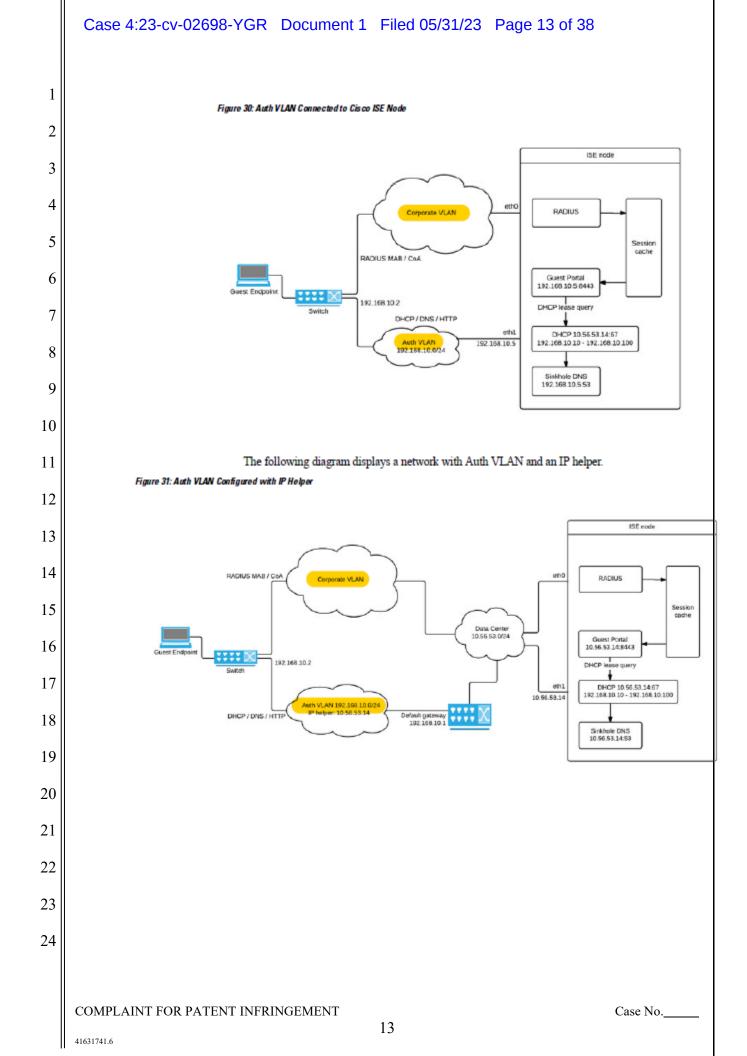

| 1  | 46. Cisco then used its size and market presence to sell its infringing version of its           |  |  |  |  |
|----|--|--|--|--|--|
| 2  | NAC technology, including ISE, to drive revenue and additionally further its sales of its access |  |  |  |  |
| 3  | points, servers, software, and other products in its security infrastructure.                    |  |  |  |  |
| 4  | 47. On information and belief, and at least given the InfoExpress-Cisco relationship,            |  |  |  |  |
| 5  | Cisco was aware of InfoExpress's pending Patent Portfolio and the Patents-in-Suit at the time of |  |  |  |  |
| 6  | such relationship and then following thereafter.   |  |  |  |  |
| 7  | 48. In addition, Cisco has knowledge of the Patent Portfolio including certain of the            |  |  |  |  |
| 8  | Patents-in-Suit, and of its infringement thereof, because of Cisco's own patent prosecution.     |  |  |  |  |
| 9  | 49. In Cisco's prosecution of U.S. Published App. No. 2013/0290224, the United                   |  |  |  |  |
| 10 | States Patent and Trademark Office issued a February 3, 2015 Non-Final Rejection which           |  |  |  |  |
| 11 | discusses InfoExpress's U.S. Patent No. 8,347,351 and its disclosure of "document the full state |  |  |  |  |
| 12 | machine for port level authentication of one of a: personal computer or phone (citing Fig. 1,    |  |  |  |  |
| 13 | elements 110 and 120, abstract, security policy [col. 2:56-3:33, 6:25-41])."                     |  |  |  |  |
| 14 | 50. Cisco's May 1, 2015 Response to that Non-Final Rejection discusses and                       |  |  |  |  |
| 15 | characterizes InfoExpress's '351 Patent.   |  |  |  |  |
| 16 | 51. In the prosecution of Cisco's application no. 11/608,114, the Examiner's May 14,             |  |  |  |  |
| 17 | 2009 rejection cited to InfoExpress's published, pending application 2005/0063400 A1 (which,     |  |  |  |  |
| 18 | at that time, had matured into the asserted '484 Patent).  |  |  |  |  |
| 19 | 52. Cisco's patent prosecution at the U.S. Patent and Trademark Office meant that                |  |  |  |  |
| 20 | Cisco had knowledge of at least the '484 and '351 patents. Given the prior relationship between  |  |  |  |  |
| 21 | Cisco and InfoExpress, coupled with these rejections, Cisco must have tracked any continuations  |  |  |  |  |
| 22 | of the cited InfoExpress patent applications, and thereby had additional knowledge of the        |  |  |  |  |
| 23 | Patents-in-Suit upon issuance.   |  |  |  |  |
| 24 |  |  |  |  |  |
|    |  |  |  |  |  |
|    | COMPLAINT FOR PATENT INFRINGEMENT Case No  |  |  |  |  |

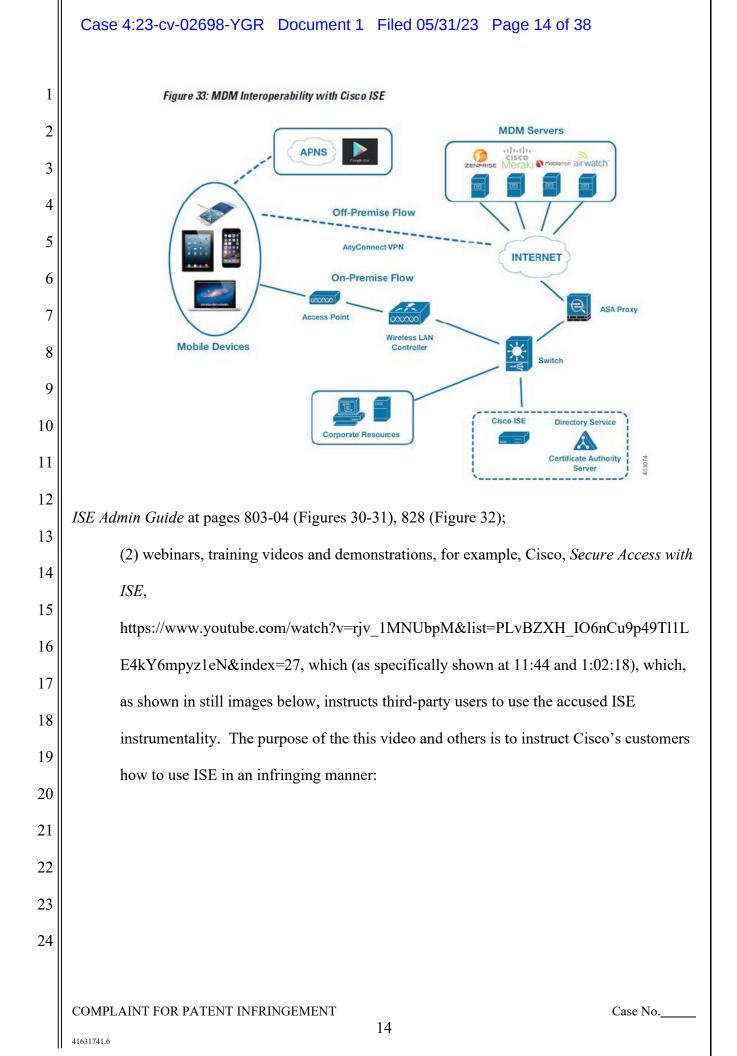

11

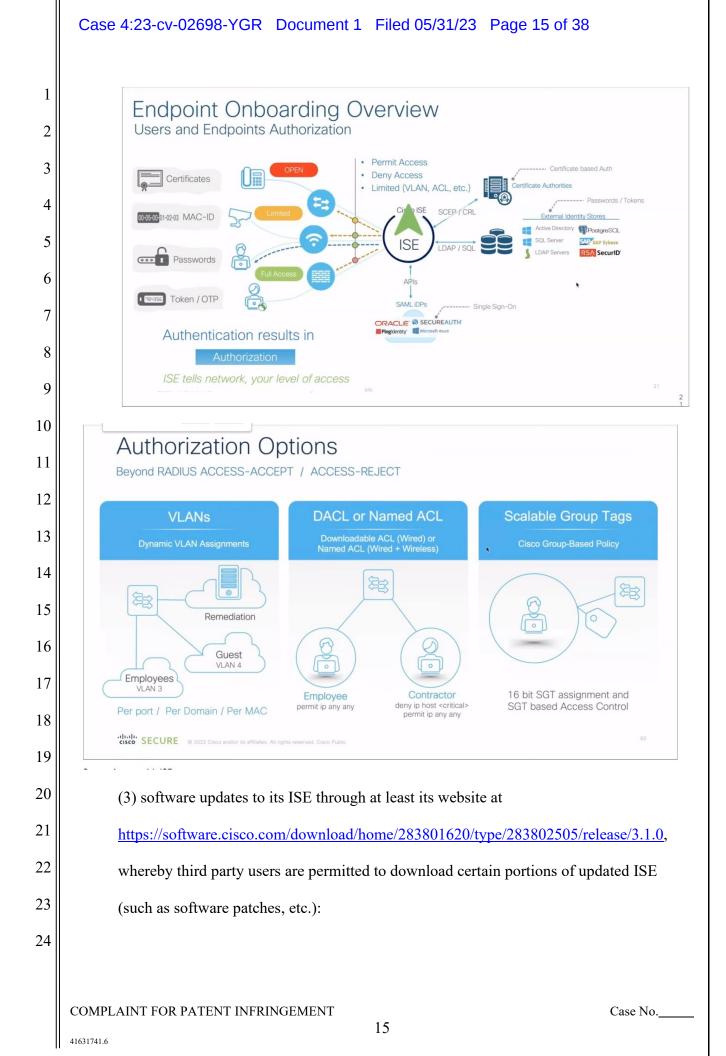

41631741.6

| 1  | 53. Accordingly, because of Cisco's knowledge of InfoExpress's Patent Portfolio,                      |
|----|---|
| 2  | including the Patents-in-Suit, coupled with Cisco's and InfoExpress's previous relationship, and      |
| 3  | Cisco's knowledge obtained through prosecution of its own patent portfolio, Cisco knew of the         |
| 4  | InfoExpress Patent Portfolio (including the Patents-In-Suit) and had knowledge of its                 |
| 5  | infringement, or at least was willfully blind to its infringement.                                    |
| 6  | 54. Cisco has been aware that it infringes the Patents-in-Suit since at least as of the               |
| 7  | date of filing this Complaint, and at earliest of the first to issue patents. Since obtaining         |
| 8  | knowledge of its infringing activities, Cisco has failed to cease its infringing activities.          |
| 9  | 55. Cisco has infringed, and continues to infringe, claims of the Patents-In-Suit in the              |
| 10 | United States by making, using, offering for sale, selling and/or importing the Accused               |
| 11 | Instrumentalities in violation of 35 U.S.C. § 271(a).   |
| 12 | 56. Cisco induces infringement by others of one or more claims of the Patents-in-Suit                 |
| 13 | in violation of 35 U.S.C. § 271(b) in aiding, instructing, promoting, encouraging or otherwise        |
| 14 | acting with the intent to cause other parties, including customers, to use its Accused                |
| 15 | Instrumentalities. Cisco is aware of the Patents-in-Suit, at least as of the filing and/or service of |
| 16 | this lawsuit, and knows or should have known that the inducing acts described herein constitutes      |
| 17 | infringement of the Patents-in-Suit.  |
| 18 | 57. Cisco takes specific steps to actively induce others—for example, customers—to                    |
| 19 | use the Accused Instrumentalities and intentionally instructs infringing use at least by providing:   |
| 20 | (1) brochures, installation and user guides, such as its ISE Admin Guide, which as                    |
| 21 | discussed above, instructs Cisco's customers to use ISE in infringing manner, as shown                |
| 22 | below by way of example. The purpose of the Admin Guide and other literature is to                    |
| 23 | instruct Cisco's customers how to use ISE in an infringing manner:                                    |
| 24 |   |
|    |   |

|                                 | Case   | 4:23-cv-02698-`           | YGR Document 1                   | Filed 05/31/23 P                 | age 20 of 38                      |          |  |
|---------------------------------|--|---------------------------|----------------------------------|----------------------------------|-----------------------------------|----------|--|
| 1<br>2<br>3<br>4<br>5<br>6<br>7 | The Cisco <sup>®</sup> Secure Network Server is based on the Cisco UCS <sup>®</sup> C220 Rack Server and is configured specifically to support the Cisco Identity Services Engine (ISE) security application. The Secure Network Server supports these applications in five versions. The Cisco Secure Network Server 3615 is designed for small deployments. The Secure Network Server 3655 and 3695 have several redundant components such as hard disks and power supplies, making it suitable for larger deployments that require highly reliable system configurations. Figure 1 shows the Cisco Secure Network Server. Figure 1. Figure 1. Cisco SNS-3615, SNS-3655, and SNS-3695 Secure Network Server Product specifications of the Cisco Secure Network Server. |                           |                                  |                                  |                                   |          |  |

|                                 | COMPL  | AINT FOR PATENT           | INFRINGEMENT                     | 20                               | Case N                            | No       |  |

| 1  | 64. Cisco undertook and continues its infringing actions despite that it knew and/or                   |  |
|----|--|--|
| 2  | should have known that its actions constituted an unjustifiably high risk that its activities          |  |
| 3  | infringed the Patents-in-Suit, which were duly issued by the USPTO, and are presumed valid.            |  |
| 4  | Since first working with InfoExpress, and at the latest, the filing of this action, Cisco has been     |  |
| 5  | aware of the unjustifiably high risk that its actions constituted and continue to constitute           |  |
| 6  | infringement of the Patents-in-Suit, and that the Patents-in-Suit are valid. Cisco could not           |  |
| 7  | reasonably, subjectively believe that its actions do not constitute infringement of the Patents-in-    |  |
| 8  | Suit, and it could not reasonably, subjectively believe that the Patents-in-Suit are invalid.          |  |
| 9  | Despite this knowledge and subjective belief, and the unjustifiably high risk that its actions         |  |
| 10 | constitute infringement, Cisco has continued its infringing activities. As such, Cisco willfully       |  |
| 11 | infringes the Patents-in-Suit.   |  |
| 12 | COUNT I: INFRINGEMENT OF THE '484 PATENT   |  |
| 13 | 65. InfoExpress incorporates all previous paragraphs by reference as if fully stated                   |  |
| 14 | herein.  |  |
| 15 | 66. InfoExpress owns all substantial rights, interest, and title in and to the '484 Patent,            |  |
| 16 | including the sole and exclusive right to prosecute this action and enforce the '484 Patent against    |  |
| 17 | infringers, and to collect damages for all relevant times.   |  |
| 18 | 67. The '484 Patent describes in technical detail each of the limitations of the claims,               |  |
| 19 | allowing a skilled artisan to understand the scope of the claims and how the non-conventional          |  |
| 20 | and non-generic combination of claim limitations is patentably distinct from and improved upon         |  |
| 21 | what may have been conventional or generic in the art at the time of the invention.                    |  |
| 22 | 68. As set forth in the attached exemplary non-limiting Claim Chart (Exhibit G),                       |  |
| 23 | Cisco, without authorization or license from InfoExpress, has been and is presently directly           |  |
| 24 | infringing, literally or under the doctrine of equivalents, at least one claim, including claim 41, of |  |
|    |  |  |

the '484 Patent, pursuant to 35 U.S.C. § 271(a), including through making, using, selling,
 offering to sell, and importing, in the United States the Accused Instrumentalities.

3 69. Cisco actively induces infringement under § 271(b) of at least one claim of the 4 '484 Patent by selling to its customers the Accused Instrumentalities with instructions as to how 5 to use the Accused Instrumentalities in a method such as recited in the '484 Patent. Cisco 6 knowingly aids, instructs, or otherwise acts with the specific intent to cause an end user to use 7 the Accused Instrumentalities. As noted above in paragraph 57, Cisco provides to third parties 8 (including its customers) (1) brochures and literature such as its ISE Admin Guide; (2) webinars, 9 training videos and demonstrations; (3) software updates to ISE; (4) product support for ISE; and 10 (5) an online community for NAC and ISE support, all of which instruct those third parties to 11 infringe the '484 patent. Additionally, Cisco knew of the '484 Patent and knew that its use and 12 sale of the Accused Instrumentalities infringe at least one claim of the '484 Patent, and Cisco is 13 thus liable for inducement of the '484 Patent pursuant to 35 U.S.C. § 271(b).

70. 14 Cisco is liable for contributory infringement under 271(c) of at least one claim 15 of the '484 Patent by providing, and by having knowingly provided the Accused 16 Instrumentalities, including the Cisco Servers and the ISE software and devices used to infringe 17 at least one claim of the '484 Patent. Cisco's ISE software, as sold, contains instructions for 18 performing the claimed methods of the '484 patent. Similarly, Cisco Servers are material parts 19 of InfoExpress's claimed inventions, and are configured to practice InfoExpress's claimed 20 methods of NAC. For example, Cisco's software and devices reconfigure the communication 21 port of an access point for communicating data between a user endpoint and protected resources 22 on a protected network, once requirements of the security policy are satisfied.

23 71. Cisco has known or should have known that its Cisco Servers and ISE software
24 and devices are especially made or especially adapted for use in infringement of the Patents-in-

#### COMPLAINT FOR PATENT INFRINGEMENT

### Case 4:23-cv-02698-YGR Document 1 Filed 05/31/23 Page 23 of 38

Suit, not staple articles, and not commodities of commerce suitable for substantially
 noninfringing use.

3 72. To the extent 35 U.S.C. § 287 is determined to be applicable, its requirements
4 have been satisfied with respect to the '484 Patent.

73. InfoExpress has been damaged as a result of the infringing conduct by Cisco
alleged above. Thus, Cisco is liable to InfoExpress in an amount that compensates it for such
infringement, which by law cannot be less than a reasonable royalty and in an amount yet to be
determined. InfoExpress is also entitled to receive such other and further relief, as this Court
deems just and proper.

10 74. InfoExpress alleges that Cisco's infringement of the '484 Patent has been and 11 continues to be deliberate and willful and egregious, and, therefore, this is an exceptional case 12 warranting an award of enhanced damages for up to three times the actual damages awarded and 13 attorney's fees to InfoExpress pursuant to 35 U.S.C. §§ 284-285. As noted above, Cisco has had 14 knowledge of the '484 Patent or at least was willfully blind to its infringement, as well as related 15 patents and patent applications, and its infringement thereof, and yet has deliberately continued 16 to infringe in a wanton, malicious, and egregious manner, with reckless disregard for 17 InfoExpress's patent rights. Thus, Cisco's infringing actions have been and continue to be 18 consciously wrongful.

19 75. Cisco's use of the '484 Patent is not licensed or authorized by InfoExpress in any
20 way.

21

## COUNT II: INFRINGEMENT OF THE '460 PATENT

22 76. InfoExpress incorporates all previous paragraphs by reference as if fully stated
23 herein.

24

COMPLAINT FOR PATENT INFRINGEMENT

41631741.6

77. InfoExpress owns all substantial rights, interest, and title in and to the '460 Patent,
 including the sole and exclusive right to prosecute this action and enforce the '460 Patent against
 infringers, and to collect damages for all relevant times.

- The '460 Patent describes in technical detail each of the limitations of the claims,
  allowing a skilled artisan to understand the scope of the claims and how the non-conventional
  and non-generic combination of claim limitations is patentably distinct from and improved upon
  what may have been conventional or generic in the art at the time of the invention.
- 79. As set forth in the attached exemplary non-limiting Claim Chart (Exhibit H),
  Cisco, without authorization or license from InfoExpress, has been and is presently directly
  infringing, literally or under the doctrine of equivalents, at least one claim, including claim 16, of
  the '460 Patent, pursuant to 35 U.S.C. § 271(a), including through making, using, selling,
- 12 offering to sell, and importing, in the United States the Accused Instrumentalities.
- 13 80. Cisco actively induces infringement under § 271(b) of at least one claim of the 14 '460 Patent by selling to its customers the Accused Instrumentalities with instructions as to how 15 to use the Accused Instrumentalities in a method such as recited in the '460 Patent. Cisco 16 knowingly aids, instructs, or otherwise acts with the specific intent to cause an end user to use 17 the Accused Instrumentalities. As noted above in paragraph 57, Cisco provides to third parties 18 (including its customers) (1) brochures and literature such as its ISE Admin Guide; (2) webinars, 19 training videos and demonstrations; (3) software updates to ISE; (4) product support for ISE; and 20 (5) an online community for NAC and ISE support, all of which instruct those third parties to 21 infringe the '460 patent. Additionally, Cisco knew of the '460 Patent and knew that its use and 22 sale of the Accused Instrumentalities infringe at least one claim of the '460 Patent, and Cisco is 23 thus liable for inducement of the '460 Patent pursuant to 35 U.S.C. § 271(b).
- 24

| 1  | 81. Cisco is liable for contributory infringement under § 271(c) of at least one claim            |  |  |
|----|---|--|--|
| 2  | of the '460 Patent by providing, and by having knowingly provided the Accused                     |  |  |
| 3  | Instrumentalities, including the Cisco Servers and the ISE software and devices used to infringe  |  |  |
| 4  | at least one claim of the '460 Patent. Cisco's ISE software, as sold, contains instructions for   |  |  |
| 5  | performing the claimed methods of the '460 patent. Similarly, Cisco Servers are material parts    |  |  |
| 6  | of InfoExpress's claimed inventions, and are configured to practice InfoExpress's claimed         |  |  |
| 7  | methods of NAC. Additionally, Cisco's software and devices reconfigure the communication          |  |  |
| 8  | port of an access point for communicating data between a user endpoint and protected resources    |  |  |
| 9  | on a protected network, once requirements of the security policy are satisfied.                   |  |  |
| 10 | 82. Cisco has known or should have known that its Cisco Servers and ISE software                  |  |  |
| 11 | and devices are especially made or especially adapted for use in infringement of the Patents-in-  |  |  |
| 12 | Suit, not staple articles, and not commodities of commerce suitable for substantially             |  |  |
| 13 | noninfringing use.  |  |  |

| 8  | COUNT III: INFRINGEMENT OF THE '450 PATENT  |  |  |  |
| 9  | 87. InfoExpress incorporates all previous paragraphs by reference as if fully stated                  |  |  |  |
| 10 | herein.   |  |  |  |
| 11 | 88. InfoExpress owns all substantial rights, interest, and title in and to the '450 Patent,           |  |  |  |
| 12 | including the sole and exclusive right to prosecute this action and enforce the '450 Patent against   |  |  |  |
| 13 | infringers, and to collect damages for all relevant times.  |  |  |  |
| 14 | 89. The '450 Patent describes in technical detail each of the limitations of the claims,              |  |  |  |
| 15 | allowing a skilled artisan to understand the scope of the claims and how the non-conventional         |  |  |  |
| 16 | and non-generic combination of claim limitations is patentably distinct from and improved upon        |  |  |  |
| 17 | what may have been conventional or generic in the art at the time of the invention.                   |  |  |  |
| 18 | 90. As set forth in the attached exemplary non-limiting Claim Chart (Exhibit I),                      |  |  |  |
| 19 | Cisco, without authorization or license from InfoExpress, has been and is presently directly          |  |  |  |
| 20 | infringing, literally or under the doctrine of equivalents, at least one claim, including claim 1, of |  |  |  |
| 21 | the '450 Patent, pursuant to 35 U.S.C. § 271(a), including through making, using, selling,            |  |  |  |
| 22 | offering to sell, and importing, in the United States the Accused Instrumentalities.                  |  |  |  |
| 23 | 91. Cisco actively induces infringement under § 271(b) of at least one claim of the                   |  |  |  |
| 24 | '450 Patent by selling to its customers the Accused Instrumentalities with instructions as to how     |  |  |  |
|    |   |  |  |  |
|    | COMPLAINT FOR PATENT INFRINGEMENT Case No 26  |  |  |  |

#### Case 4:23-cv-02698-YGR Document 1 Filed 05/31/23 Page 27 of 38

1 to use the Accused Instrumentalities in a method such as recited in the '450 Patent. Cisco 2 knowingly aids, instructs, or otherwise acts with the specific intent to cause an end user to use 3 the Accused Instrumentalities. As noted above in paragraph 57, Cisco provides to third parties 4 (including its customers) (1) brochures and literature such as its ISE Admin Guide; (2) webinars, 5 training videos and demonstrations; (3) software updates to ISE; (4) product support for ISE; and 6 (5) an online community for NAC and ISE support, all of which instruct those third parties to 7 infringe the '450 patent. Additionally, Cisco knew of the '450 Patent and knew that its use and 8 sale of the Accused Instrumentalities infringe at least one claim of the '450 Patent, and Cisco is 9 thus liable for inducement of the '450 Patent pursuant to 35 U.S.C. § 271(b). 10 92. Cisco is liable for contributory infringement under 271(c) of at least one claim of the '450 Patent by providing, and by having knowingly provided the Accused 11 12 Instrumentalities, including the Cisco Servers and the ISE software and devices used to infringe 13 at least one claim of the '450 Patent. Cisco's ISE software, as sold, contains instructions for 14 performing the claimed methods of the '450 patent. Similarly, Cisco Servers are material parts 15 of InfoExpress's claimed inventions, and are configured to practice InfoExpress's claimed 16 methods of NAC. Additionally, Cisco's software and devices scan a network device connected 17 to an access point to collect information regarding that device, apply a security policy that relates 18 to such information, and configure the access point in response to a result of applying the 19 security policy. Cisco has known or should have known that its Cisco Servers and ISE software 20 93. 21 and devices are especially made or especially adapted for use in infringement of the Patents-in-22 Suit, not staple articles, and not commodities of commerce suitable for substantially

27

23 noninfringing use.

24

41631741.6

94. To the extent 35 U.S.C. § 287 is determined to be applicable, its requirements
 have been satisfied with respect to the '450 Patent.

95. InfoExpress has been damaged as a result of the infringing conduct by Cisco
alleged above. Thus, Cisco is liable to InfoExpress in an amount that compensates it for such
infringement, which by law cannot be less than a reasonable royalty and in an amount yet to be
determined. InfoExpress is also entitled to receive such other and further relief, as this Court
deems just and proper.

8 96. InfoExpress alleges that Cisco's infringement of the '450 Patent has been and 9 continues to be deliberate and willful and egregious, and, therefore, this is an exceptional case 10 warranting an award of enhanced damages for up to three times the actual damages awarded and 11 attorney's fees to InfoExpress pursuant to 35 U.S.C. §§ 284-285. As noted above, Cisco has had 12 knowledge of the '450 Patent or at least was willfully blind to its infringement, as well as related 13 patents and patent applications, and its infringement thereof, and yet has deliberately continued 14 to infringe in a wanton, malicious, and egregious manner, with reckless disregard for 15 InfoExpress's patent rights. Thus, Cisco's infringing actions have been and continue to be 16 consciously wrongful. 17 97. Cisco's use of the '450 Patent is not licensed or authorized by InfoExpress in any 18 way. 19 **COUNT IV: INFRINGEMENT OF THE '444 PATENT** 20 98. InfoExpress incorporates all previous paragraphs by reference as if fully stated 21 herein. 22 99. InfoExpress owns all substantial rights, interest, and title in and to the '444 Patent, 23 including the sole and exclusive right to prosecute this action and enforce the '444 Patent against

24 infringers, and to collect damages for all relevant times.

COMPLAINT FOR PATENT INFRINGEMENT

28

1 100. The '444 Patent describes in technical detail each of the limitations of the claims,
 2 allowing a skilled artisan to understand the scope of the claims and how the non-conventional
 3 and non-generic combination of claim limitations is patentably distinct from and improved upon
 4 what may have been conventional or generic in the art at the time of the invention.

101. As set forth in the attached exemplary non-limiting Claim Chart (Exhibit J),
Cisco, without authorization or license from InfoExpress, has been and is presently directly
infringing, literally or under the doctrine of equivalents, at least one claim, including claim 1, of
the '444 Patent, pursuant to 35 U.S.C. § 271(a), including through making, using, selling,
offering to sell, and importing, in the United States the Accused Instrumentalities.

10 102. Cisco actively induces infringement under § 271(b) of at least one claim of the 11 '444 Patent by selling to its customers the Accused Instrumentalities with instructions as to how 12 to use the Accused Instrumentalities in a method such as recited in the '444 Patent. Cisco 13 knowingly aids, instructs, or otherwise acts with the specific intent to cause an end user to use 14 the Accused Instrumentalities. As noted above in paragraph 57, Cisco provides to third parties 15 (including its customers) (1) brochures and literature such as its ISE Admin Guide; (2) webinars, 16 training videos and demonstrations; (3) software updates to ISE; (4) product support for ISE; and 17 (5) an online community for NAC and ISE support, all of which instruct those third parties to 18 infringe the '444 patent. Additionally, Cisco knew of the '444 Patent and knew that its use and 19 sale of the Accused Instrumentalities infringe at least one claim of the '444 Patent, and Cisco is 20 thus liable for inducement of the '444 Patent pursuant to 35 U.S.C. § 271(b).

21 103. Cisco is liable for contributory infringement under § 271(c) of at least one claim
22 of the '444 Patent by providing, and by having knowingly provided the Accused
23 Instrumentalities, including the Cisco Servers and the ISE software and devices used to infringe

24 at least one claim of the '444 Patent. Cisco's ISE software, as sold, contains instructions for

COMPLAINT FOR PATENT INFRINGEMENT

#### Case 4:23-cv-02698-YGR Document 1 Filed 05/31/23 Page 30 of 38

performing the claimed methods of the '444 patent. Similarly, Cisco Servers are material parts
of InfoExpress's claimed inventions, and are configured to practice InfoExpress's claimed
methods of NAC. Additionally, Cisco's software and devices authenticate using an EAP
protocol, send a request for audit data to an agent running on a device, receive audit data from
that device in response to that request, and apply a security policy relating to the audit data and
the authentication.

7 104. Cisco has known or should have known that its Cisco Servers and ISE software
8 and devices are especially made or especially adapted for use in infringement of the Patents-in9 Suit, not staple articles, and not commodities of commerce suitable for substantially
10 noninfringing use.

11 105. To the extent 35 U.S.C. § 287 is determined to be applicable, its requirements
12 have been satisfied with respect to the '444 Patent.

13 106. InfoExpress has been damaged as a result of the infringing conduct by Cisco
14 alleged above. Thus, Cisco is liable to InfoExpress in an amount that compensates it for such
15 infringement, which by law cannot be less than a reasonable royalty and in an amount yet to be
16 determined. InfoExpress is also entitled to receive such other and further relief, as this Court
17 deems just and proper.

18 107. InfoExpress alleges that Cisco's infringement of the '444 Patent has been and
19 continues to be deliberate and willful and egregious, and, therefore, this is an exceptional case
20 warranting an award of enhanced damages for up to three times the actual damages awarded and
21 attorney's fees to InfoExpress pursuant to 35 U.S.C. §§ 284-285. As noted above, Cisco has had
22 knowledge of the '444 Patent or at least was willfully blind to its infringement, as well as related
23 patents and patent applications, and its infringement thereof, and yet has deliberately continued
24 to infringe in a wanton, malicious, and egregious manner, with reckless disregard for

#### COMPLAINT FOR PATENT INFRINGEMENT

InfoExpress's patent rights. Thus, Cisco's infringing actions have been and continue to be
 consciously wrongful.

3 108. Cisco's use of the '444 Patent is not licensed or authorized by InfoExpress in any
4 way.

COUNT V: INFRINGEMENT OF THE '350 PATENT

6 109. InfoExpress incorporates all previous paragraphs by reference as if fully stated
7 herein.

8 110. InfoExpress owns all substantial rights, interest, and title in and to the '350 Patent,
9 including the sole and exclusive right to prosecute this action and enforce the '350 Patent against
10 infringers, and to collect damages for all relevant times.

- 11 11. The '350 Patent describes in technical detail each of the limitations of the claims,
  12 allowing a skilled artisan to understand the scope of the claims and how the non-conventional
  13 and non-generic combination of claim limitations is patentably distinct from and improved upon
  14 what may have been conventional or generic in the art at the time of the invention.
- 15 112. As set forth in the attached exemplary non-limiting Claim Chart (Exhibit K),
- 16 Cisco, without authorization or license from InfoExpress, has been and is presently directly

17 infringing, literally or under the doctrine of equivalents, at least one claim, including claim 1, of

18 the '350 Patent, pursuant to 35 U.S.C. § 271(a), including through making, using, selling,

19 offering to sell, and importing, in the United States the Accused Instrumentalities.

20 113. Cisco actively induces infringement under § 271(b) of at least one claim of the
21 '350 Patent by selling to its customers the Accused Instrumentalities with instructions as to how
22 to use the Accused Instrumentalities in a method such as recited in the '350 Patent. Cisco
23 knowingly aids, instructs, or otherwise acts with the specific intent to cause an end user to use
24 the Accused Instrumentalities. As noted above in paragraph 57, Cisco provides to third parties

COMPLAINT FOR PATENT INFRINGEMENT

5

(including its customers) (1) brochures and literature such as its ISE Admin Guide; (2) webinars,
training videos and demonstrations; (3) software updates to ISE; (4) product support for ISE; and
(5) an online community for NAC and ISE support, all of which instruct those third parties to
infringe the '350 patent. Additionally, Cisco knew of the '350 Patent and knew that its use and
sale of the Accused Instrumentalities infringe at least one claim of the '350 Patent, and Cisco is
thus liable for inducement of the '350 Patent pursuant to 35 U.S.C. § 271(b).

7 114. Cisco is liable for contributory infringement under 271(c) of at least one claim 8 of the '350 Patent by providing, and by having knowingly provided the Accused 9 Instrumentalities, including the Cisco Servers and the ISE software and devices used to infringe 10 at least one claim of the '350 Patent. Cisco's ISE software, as sold, contains instructions for performing the claimed methods of the '350 patent. Similarly, Cisco Servers are material parts 11 12 of InfoExpress's claimed inventions, and are configured to practice InfoExpress's claimed 13 methods of NAC. Additionally, Cisco's software and devices receive audit data pertaining to a 14 device that does not have access to a less-restricted subset of a network, audit the device in 15 accordance with a security policy based at least in part on the audit data, reconfigure an access 16 point to allow access to the less-restricted subset of the network in response to the security policy 17 audit, and continually receive and evaluate updated audit data.

18 115. Cisco has known or should have known that its Cisco Servers and ISE software
and devices are especially made or especially adapted for use in infringement of the Patents-in20 Suit, not staple articles, and not commodities of commerce suitable for substantially

21 noninfringing use.

116. To the extent 35 U.S.C. § 287 is determined to be applicable, its requirements
have been satisfied with respect to the '350 Patent.

and non-generic combination of claim limitations is patentably distinct from and improved upon
 what may have been conventional or generic in the art at the time of the invention.

123. As set forth in the attached exemplary non-limiting Claim Chart (Exhibit L),
Cisco, without authorization or license from InfoExpress, has been and is presently directly
infringing, literally or under the doctrine of equivalents, at least one claim, including claim 1, of
the '645 Patent, pursuant to 35 U.S.C. § 271(a), including through making, using, selling,
offering to sell, and importing, in the United States the Accused Instrumentalities.

8 Cisco actively induces infringement under § 271(b) of at least one claim of the 124. 9 '645 Patent by selling to its customers the Accused Instrumentalities with instructions as to how 10 to use the Accused Instrumentalities in a method such as recited in the '645 Patent. Cisco knowingly aids, instructs, or otherwise acts with the specific intent to cause an end user to use 11 12 the Accused Instrumentalities. As noted above in paragraph 57, Cisco provides to third parties 13 (including its customers) (1) brochures and literature such as its ISE Admin Guide; (2) webinars, 14 training videos and demonstrations; (3) software updates to ISE; (4) product support for ISE; and 15 (5) an online community for NAC and ISE support, all of which instruct those third parties to 16 infringe the '645 patent. Additionally, Cisco knew of the '645 Patent and knew that its use and 17 sale of the Accused Instrumentalities infringe at least one claim of the '645 Patent, and Cisco is 18 thus liable for inducement of the '645 Patent pursuant to 35 U.S.C. § 271(b). 19 Cisco is liable for contributory infringement under 271(c) of at least one claim 125. 20 of the '645 Patent by providing, and by having knowingly provided the Accused 21 Instrumentalities, including the Cisco Servers and the ISE software and devices used to infringe 22 at least one claim of the '645 Patent. Cisco's ISE software, as sold, contains instructions for

- 23 performing the claimed methods of the '645 patent. Similarly, Cisco Servers are material parts
- 24 of InfoExpress's claimed inventions, and are configured to practice InfoExpress's claimed

1 methods of NAC. Additionally, Cisco's software and devices formulate and send audit requests 2 to user devices (i.e. endpoints), receive information in response to those audit requests, evaluate 3 that information, receive authentication information from the device using an extensible 4 authentication protocol (EAP), and configure an access point in response to approval of the 5 device by a gatekeeper. 6 Cisco has known or should have known that its Cisco Servers and ISE software 126. 7 and devices are especially made or especially adapted for use in infringement of the Patents-in-8 Suit, not staple articles, and not commodities of commerce suitable for substantially 9 noninfringing use. 10 127. To the extent 35 U.S.C. § 287 is determined to be applicable, its requirements have been satisfied with respect to the '645 Patent. 11 12 InfoExpress has been damaged as a result of the infringing conduct by Cisco 128. 13 alleged above. Thus, Cisco is liable to InfoExpress in an amount that compensates it for such 14 infringement, which by law cannot be less than a reasonable royalty and in an amount yet to be 15 determined. InfoExpress is also entitled to receive such other and further relief, as this Court 16 deems just and proper. 17 129. InfoExpress alleges that Cisco's infringement of the '645 Patent has been and 18 continues to be deliberate and willful and egregious, and, therefore, this is an exceptional case 19 warranting an award of enhanced damages for up to three times the actual damages awarded and 20 attorney's fees to InfoExpress pursuant to 35 U.S.C. §§ 284-285. As noted above, Cisco has had 21 knowledge of the '645 Patent or at least was willfully blind to its infringement, as well as related 22 patents and patent applications, and its infringement thereof, and yet has deliberately continued 23 to infringe in a wanton, malicious, and egregious manner, with reckless disregard for 24

COMPLAINT FOR PATENT INFRINGEMENT

35

InfoExpress's patent rights. Thus, Cisco's infringing actions have been and continue to be
 consciously wrongful.

3 130. Cisco's use of the '645 Patent is not licensed or authorized by InfoExpress in any
4 way.

## 5 VI. <u>DEMAND FOR JURY TRIAL</u>

Pursuant to Federal Rule of Civil Procedure 38(b), InfoExpress hereby demands a trial by
jury of any and all issues triable of right before a jury.

## 8 VII. <u>PRAYER FOR RELIEF</u>

9

20

WHEREFORE, InfoExpress respectfully requests that the Court:

10 A. Enter a judgment that Cisco has infringed one or more claims of the Patents-in11 Suit;

B. Enter a preliminary and permanent injunction against Cisco and its officers,
employees, agents, servants, attorneys, instrumentalities, and/or those in privity with them from
infringing the Patents-in-Suit and for all further and proper injunctive relief pursuant to 35
U.S.C. § 283.

C. Enter a judgment awarding Plaintiff InfoExpress of such damages adequate to
compensate it for Cisco's infringement of the Patents-in-Suit, including lost profits but no less
than a reasonable royalty, as well as pre-judgment and post-judgment interest at the maximum
rate permitted by law,;

D. Declare that the Patents-in-Suit are valid and enforceable;

E. Order Cisco to pay damages adequate to compensate InfoExpress for Cisco's
infringement, together with interest and costs under 35 U.S.C. § 284;

F. Order Cisco to pay supplemental damages to InfoExpress, including interest, with
an accounting, as needed;
