I. THE PARTIES

1. Plaintiff is a Texas Limited Liability Company with its principal place of business located in Austin, Texas.

2. On information and belief, Defendant is a corporation organized and existing under the laws of the State of WA, with a regular and established place of business located at 1200 Lakeside Parkway, Suite 350, Flower Mound, Texas 75028. On information and belief, Defendant sells and offers to sell products and services throughout Texas, including in this judicial district, and introduces products and services that perform infringing methods or processes into the stream of commerce knowing that they would be sold in Texas and this judicial district. Defendant can be served with process through their registered agent, Steve S San Nicolas, 1200 Lakeside Parkway, Suite 350, Flower Mound, Texas 75028, at its place of business, or anywhere else it may be found.

II. JURISDICTION AND VENUE

4. This Court has personal jurisdiction over Defendant because: (i) Defendant is present within or has minimum contacts within the State of Texas and this judicial district; (ii) Defendant has purposefully availed itself of the privileges of conducting business in the State of Texas and in this judicial district; and (iii) Plaintiff's cause of action arises directly from Defendant's business contacts and other activities in the State of Texas and in this judicial district.

5. Venue is proper in this district under 28 U.S.C. §§ 1391(b) and 1400(b). Defendant has committed acts of infringement and has a regular and established place of business in this District. Further, venue is proper because Defendant conducts substantial business in this forum, directly or through intermediaries, including: (i) at least a portion of the infringements alleged herein; and (ii) regularly doing or soliciting business, engaging in other persistent courses of conduct and/or deriving substantial revenue from goods and services provided to individuals in Texas and this District.

III. INFRINGEMENT

Plaintiff owns the '831 patent by assignment.

7. The '831 patent relates to novel and improved methods and apparatuses for monitoring a motor vehicle and an antitheft system integrated into a motor vehicle and able to communicate with a mobile device.

8. Defendant maintains, operates, and administers systems, products, and services that monitor a motor vehicle and an antitheft system integrated into the motor vehicle and able to communicate with a mobile device.that infringes one or more of claims 1-19 of the '831 patent, literally or under the doctrine of equivalents. Defendant put the inventions claimed by the '831 Patent into service (i.e., used them); but for Defendant's actions, the claimed-inventions embodiments involving Defendant's products and services would never have been put into service. Defendant's acts complained of herein caused those claimed-invention embodiments as a whole to perform, and Defendant's procurement of monetary and commercial benefit from it.

9. Support for the allegations of infringement may be found in the the chart attached as exhibit B. These allegations of infringement are preliminary and are therefore subject to change.

10. Defendant has and continues to induce infringement. Defendant has actively encouraged or instructed others (e.g., its customers and/or the customers of its related companies), and continues to do so, on how to use its products and services (e.g., methods for monitoring a motor vehicle and an antitheft system integrated into a motor vehicle and able to communicate with a mobile device.) such as to cause infringement of one or more of claims 1-19 of the '831 patent, literally or under the doctrine of equivalents. Moreover, Defendant has known of the '831 patent and the technology underlying it from at least the filing date of the lawsuit.¹ For clarity, direct infringement is previously alleged in this complaint.

11. Defendant has and continues to contributorily infringe. Defendant has actively encouraged or instructed others (e.g., its customers and/or the customers of its related companies), and continues to do so, on how to use its products and services (e.g., monitoring a motor vehicle and an antitheft system integrated into a motor vehicle and able to communicate with a mobile device)

¹ Plaintiff reserves the right to amend and add inducement pre-suit if discovery reveals an earlier date of knowledge.

and related services such as to cause infringement of one or more of claims 1-19 of the '831 patent, literally or under the doctrine of equivalents. Further, there are no substantial noninfringing uses for Defendant's products and services.
